Sir:

In response to the final Office Action dated August 7, 2008, reconsideration and allowance of the above-identified application are respectfully requested. Claims 1 and 3-46 remain pending.

Claims 1 and 3-46 are rejected for obviousness under 35 U.S.C. § 103(a) in view of the combination of U.S. Patent No. 6,567,800 to Barrera et al. ("Barrera") and U.S. Patent No. 6,961,905 to Cover et al. ("Cover"). This ground of rejection is respectfully traversed.

The combination of Barrera and Cover does not render claim 1 obvious because the combination does not disclose or suggest "means for initiating saving of a content of an Internet page displayed by a browser in response to one click of a single button displayed on the browser." Furthermore, one skilled in the art would not have been motivated to modify the automated data collection technique disclosed by Barrera to require clicking on a button displayed on an Internet page to initiate the saving of content of the Internet page.
